HISTORICAL TRENDS

CALIFORNIA DEPARTMENT OF CORRECTIONS

1983 - 2003

This report presents some basic information about the California Department of Corrections' (CDC) prisoners and parolees. Historical trend information covering the past twenty years is presented in graphs and tables for various offender characteristics and the institutional design bed capacity.

Institution Population

Figure 1 and Table 1 show the number of CDC offenders incarcerated in California state prisons, conservation camps, community correctional centers, or Department of Mental Health hospitals. The institution population grew from 39,373 in 1983 to 161,785 in 2003. This table shows an increase of 2,090 in 2003, which closely mirrors last year's increase of 2,553. The male population remains fairly steady with less than a 1 percent increase of 1432 over the last year. An increase of 671 female felon inmates caused the female population to increase 6 percent in 2003.

Racial/Ethnic Composition

Figure 2 and Table 2 present information on the racial/ethnic composition of the institution population during the 1983 to 2003 time period. Major shifts in racial composition were related to fluctuations in the percentage of Hispanic (Mexican) male inmates compared to all other groups. The percentage rose from 26.6 percent in 1983 to 36.9 percent in 2003 for Hispanic (Mexican) males (a 10.3 percentage point increase), and from 22.2 percent for Hispanic (Mexican) female inmates to 26.3 percent (a 4.1 percentage point increase). The racial composition of the White male inmates decreased from 35.1 percent in 1983 to 28.1 percent in 2003. The Black male population also dropped by 5.9 percentage point over the same period. So while the White and Black populations decrease the Hispanic (Mexican) population continues to increase.

Institution Population by Offense Category

Figure 3 and Table 3 show the change in the percentage of felon inmates incarcerated for person, property, drug, and other offenses. Over the past twenty years there has been a general decrease in person offenses. There had been a slight resurgence from 1997 to 2002, but in 2003 there was a slight decrease in person offenses for both male and female felons. Drug offenses continued to show a slight reduction of 1 percent from 2002 to 2003.

New Admissions by Offense Category

Figure 4 and Table 4 show the rate of felon new admissions by type of offense. From 1983 to 2003, the rate of felon new admissions increased from 72.59 to 119.41 per 100,000 of the California population. After experiencing a downturn in admissions from 1998 to 2001, there has been a steady increase in new admissions over the last three years.

Parole Violators Returned to Prison

Figure 5 and Table 5 present information on the number of felon parole violators returned to prison. The 2003 total showed a decrease of 7,521 in overall admissions with a slight increase in parole violators returned with a new term.

Admission/Return Status

Figure 6 and Table 6 show new admissions, Parole Violators-Returned to Custody (PV-RTCs) and Parole Violators-With New Terms (PV-WNTs) as a percentage of the overall felon institution population. From 1983 to 2003 there has been a steady rise in PV-RTCs and PV-WNTs with only a slight decrease in 2001. The percent of new admissions has decreased about 20 percentage points since 1983. There has been only a slight increase of approximately 4%, for both the male and female institution populations, over the past three years. The overall felon population rose by 2,764 during the past year.

Felon Parole and Civil Narcotic Outpatient Population

Figure 7 and Table 7 show the overall growth in the felon parole and Civil Narcotic Addict (CNA) outpatient population. Total felon parolees increased by 92,877 parolees in twenty years - from 21,259 parolees in 1983 to 114,136 parolees in 2003. There has been a decrease over the last 2 years of 7,684 parolees, with a decrease of 3,002 parolees in the last year alone.

Releases to Parole

Figure 8 and Table 8 present information on the total number of felon releases to parole each year. From 1983 to 1999 there was a steady rise in felon releases to parole. The number of releases to parole from 1999 to 2001 had a zero percent fluctuation, hovering at about 126,000 total releases to parole. In the last two years there has been a decrease in the number of felon releases to parole, with a total of about 10,000 or 9% fewer felons being released to parole. In 2003 the total felons released to parole was 115,424, a 2% decrease from the prior year.

Average Time Served on Prison Sentence

Figure 9 and Table 9 show the change in the average (median) months of time served on their prison sentence by felons first released to parole. Between 1983 and 1994, the time served for male felons had been on a steady decline from 20 months to a low of 16 months. 1990 through 1994 time served remained relatively constant. It then progressively grew to 19 months in 1996, and increased to 20 months in 2002. The average time served by felons in 2003 was 19 months.

Design Bed Capacity and Population

Figure 10 and Table 10 show the change in the design bed capacity of CDC facilities, the institution population, and the rate of occupancy from June 30, 1982 to June 30, 2002. From 1983 to 1998, design bed capacity increased more than threefold. From 1998 to 2003 the capacity has remained virtually unchanged at about 80,000 inmates. The institution population has increased from 35,965 inmates in 1983 to 153,783 inmates in 2003. The rate of occupancy increased 51.9% from 1983 to 2003, with a rate of occupancy of 191.8 % as of June 30, 2003.

This document was prepared by Jennifer Bozarth, Offender Information Services Branch. In summarizing the data, efforts were made to maintain a reasonable consistency among years as various definitions of data elements changed. Numbers and percents used in the report may not add to totals due to independent rounding.

* INSTITUTION POPULATION includes offenders sentenced to state prison who are incarcerated in a state prison, conservation camp, community correctional center, or Department of Mental Health hospital.

** CNA -- Civil Narcotic Addict.

*** OTHERS includes Youth Authority wards, county diagnostic cases, safekeepers and prisoners from other states or the federal prison system.

* Design bed capacity is the number of inmates a facility was originally designed to house. Increases or decreases indicate beds lost or gained due to conversions, additions, or deactivation.

**Rate of occupancy = population divided by number of design beds multiplied by 100.
